PARTNER PRESENTATION

# Crypto infrastructure your clients run under their own licence.

Exchange, wallet, custody and payment software, plus the technical side of a licence application. On the client's servers, as source code, or hosted by us.

November 2026 · bitpolaris.com

WHO WE ARE

# We build what we already run.

BitPolaris builds the software side of licensed crypto businesses. The core stack has run the reference exchange in production since 2024, with real users and real funds; newer modules are marked as pilot.

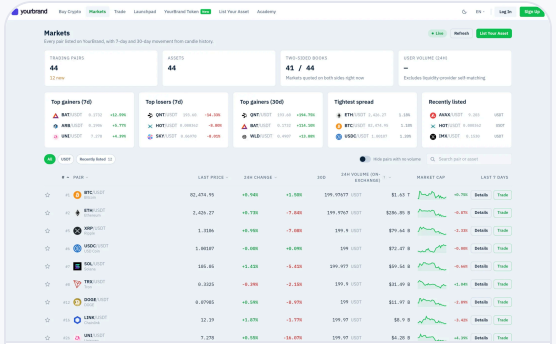

**2024**
live in production

**9**
blockchains integrated

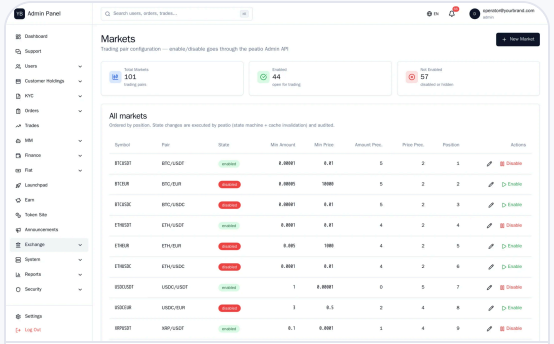

**130+**
operator screens

**1,000+**
automated tests

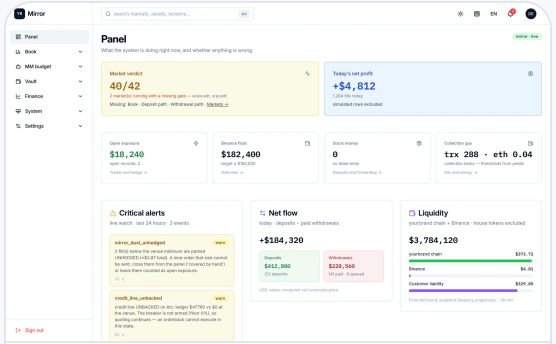

**45+**
assets listed on the reference exchange

CUSTODY · TREASURY

WHAT YOUR CLIENTS GET

# Six modules, one operations console.

Clients start with the module they need and add the rest later on the same operations console.

01

## Exchange

Spot trading with Easy Trade and the Pro terminal, market making with mirrored liquidity, Launchpad and Earn as modules, iOS and Android apps.

02

## Wallet

Web, mobile and desktop wallet with its own back office: accounts, recovery, multi-chain balances, wallet-address checks.

03

## Custody

Vaults, policy engine, multi-person approvals and a reserve monitor. Self-hosted, keys stay with the client.

04

## Payments

Hosted checkout, API and webhooks, payouts and a merchant panel for USDT, USDC and other assets.

05

## Proof of Reserves Kit

Liabilities and on-chain reserves matched and published with a verification page for customers and auditors (pilot).

06

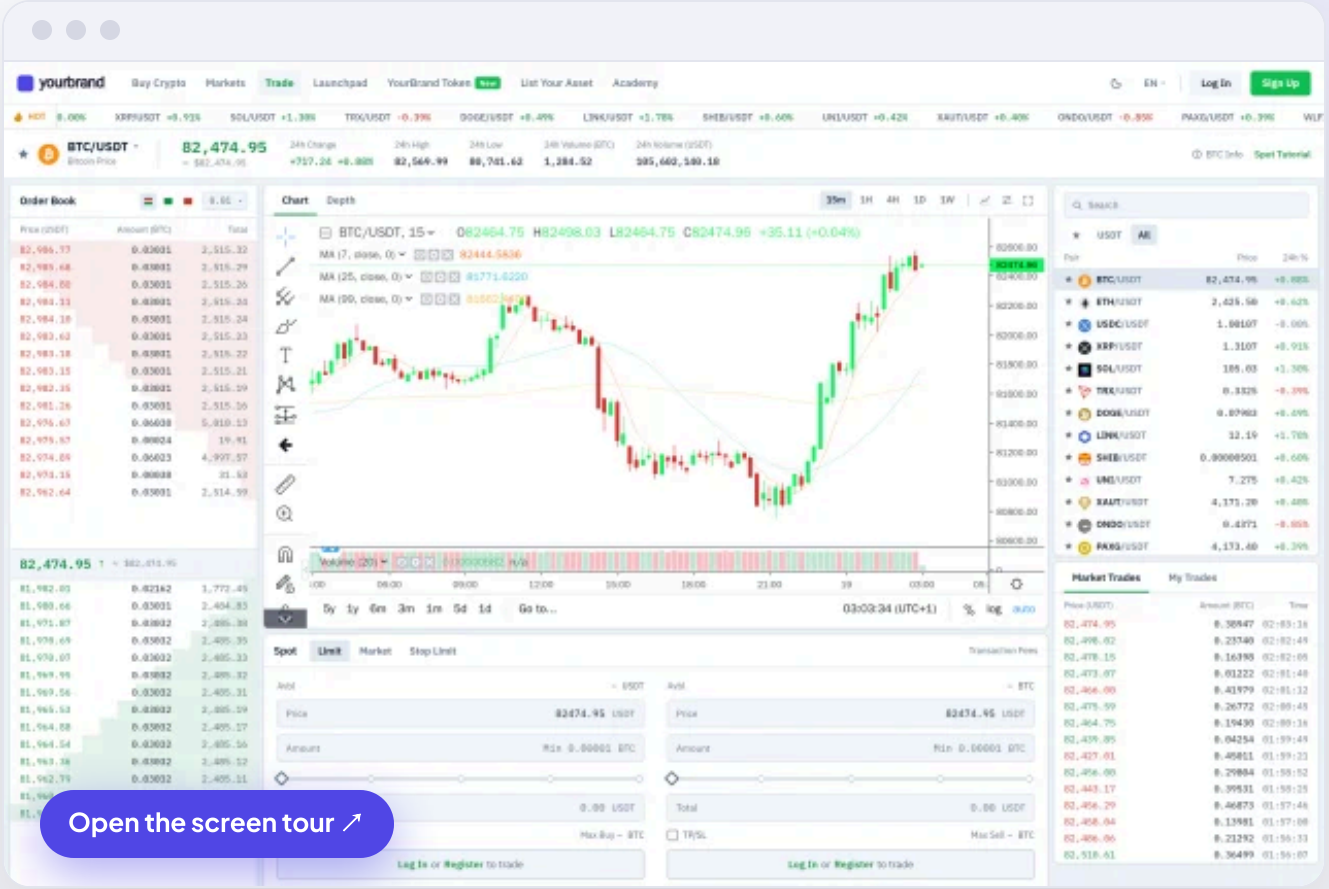

## Custom Token Platform

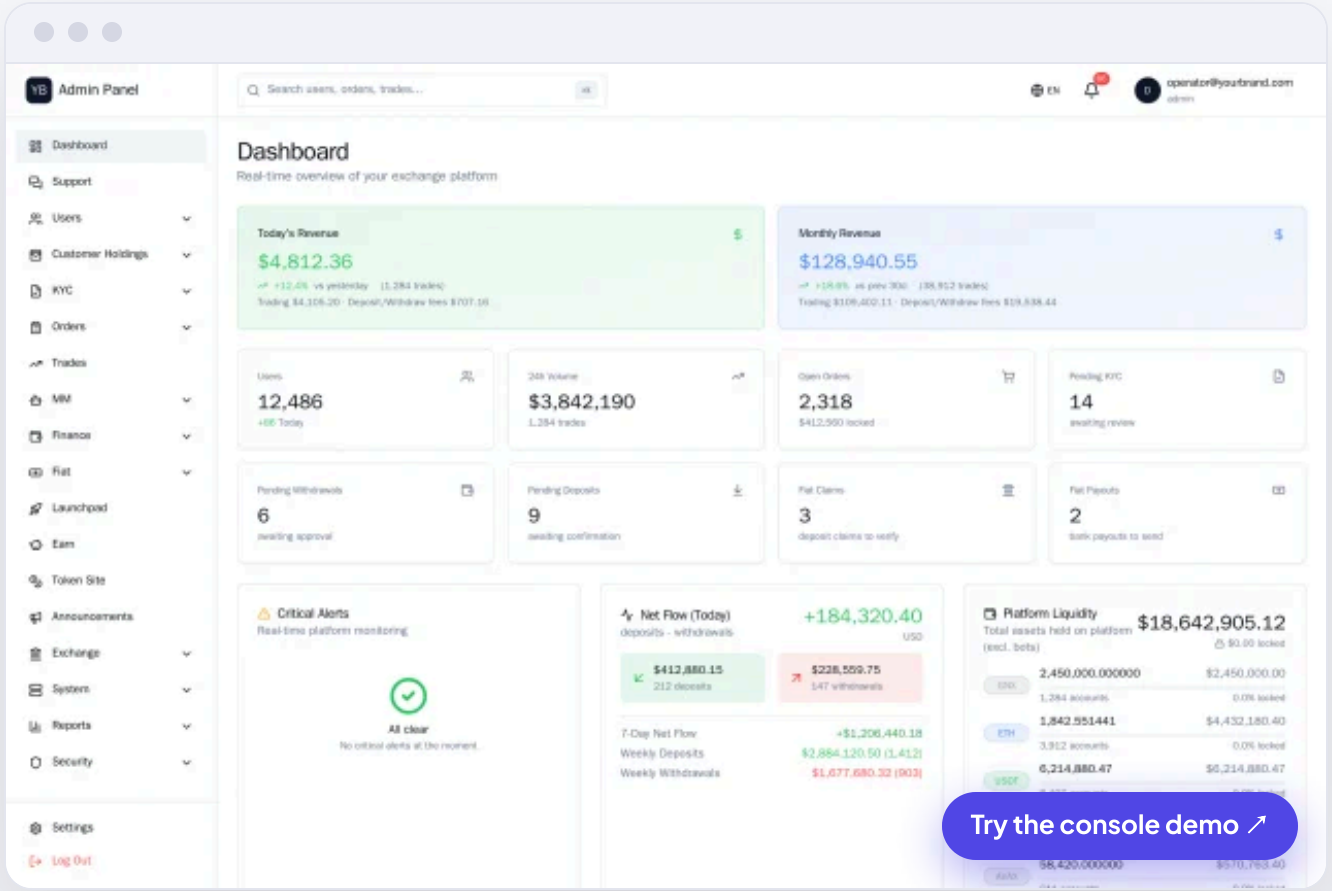

Standard OpenZeppelin-based token contract on Ethereum, BNB Smart Chain or TRON, multisig ownership, explorer verification, listing.

EXCHANGE

# A live exchange, not a demo.

- Pro terminal with order book, chart and order form; Easy Trade for first-time buyers
- Mirrored liquidity from reference venues, so a new exchange opens with depth instead of an empty book
- Operations console: KYC queue, withdrawals, fees, markets, reports and a full audit log
- Mobile apps published under the client's own developer accounts

OPERATIONS CONSOLE

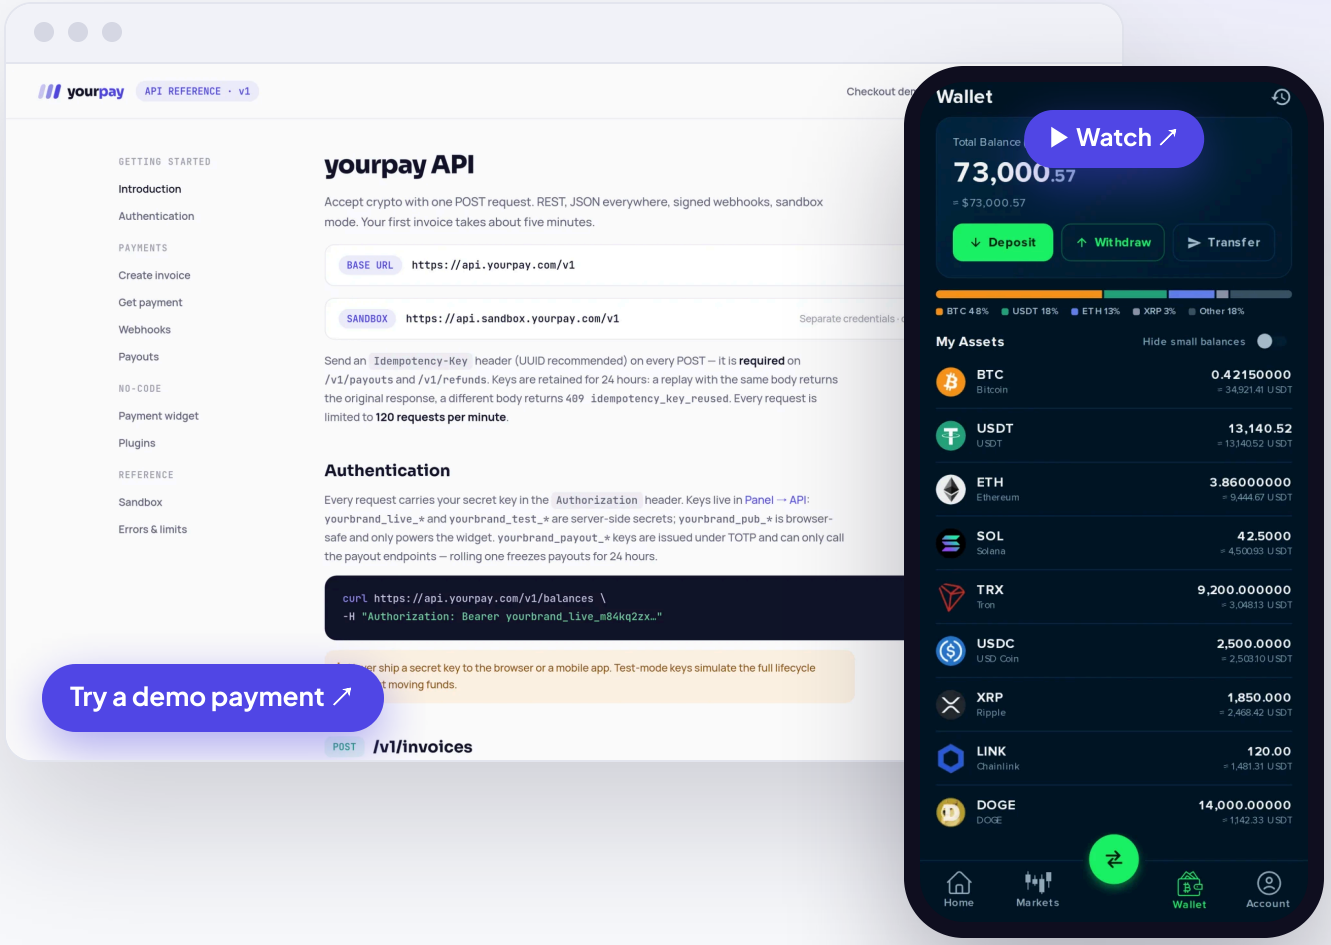

# What the operations team sees.

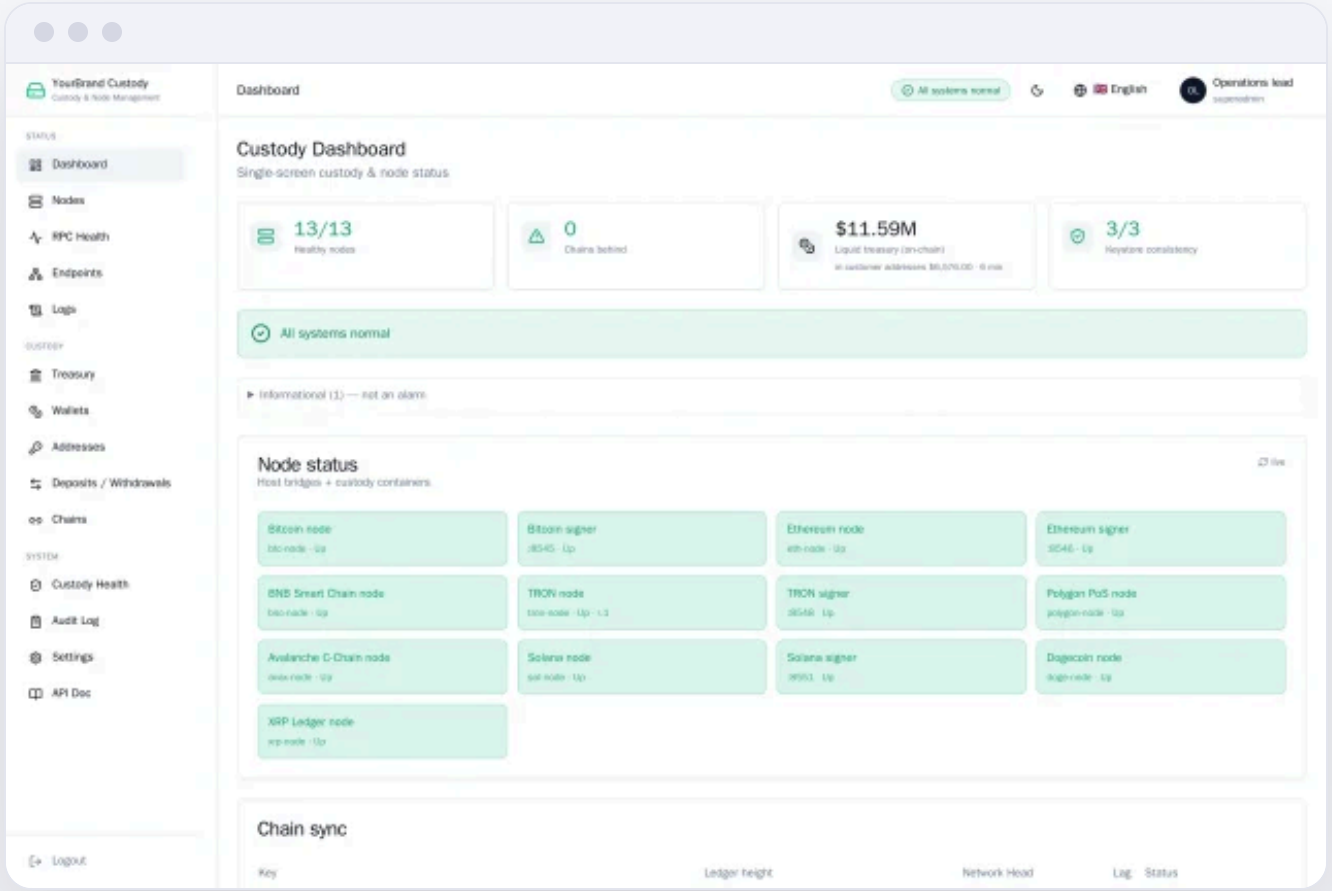

- KYC and KYB queue with two providers in parallel
- Withdrawal approvals, limits and one list for every transfer that needs attention
- Financial, trading and organic-vs-market-maker volume reports
- Every money action and settings change in the audit log

WALLET AND PAYMENTS

# For users, and for merchants.

- Wallet apps for iOS, Android, desktop and web, with deposits and withdrawals; Convert and Earn where the licence allows
- Hosted checkout and invoices in USDT and USDC, with webhooks and payouts
- Merchant panel, settlement reports and reconciliation built in

CUSTODY AND RESERVES

# Show where client assets are.

- Hot, warm and cold wallets with policy-based approvals
- Deposit scanning, sweeping and gas management across chains
- Daily reconciliation of the client ledger against on-chain balances
- Proof of Reserves pages your clients can show their customers and auditors (pilot)

SEE IT RUNNING

# Open it now, not after the meeting.

Click any tile in the PDF, or scan the code with a phone. The reference exchange runs this software in production; it is named under NDA and shown live in a guided session.

IN THE BROWSER

## Screen tour

Trading, consoles, custody and mobile screens, captured from the running system.

PRODUCT FILMS

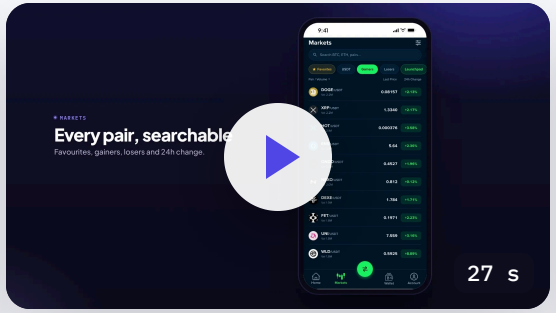

# Watch the products run.

Recorded in the real applications under a demo brand with sample data, with English subtitles.

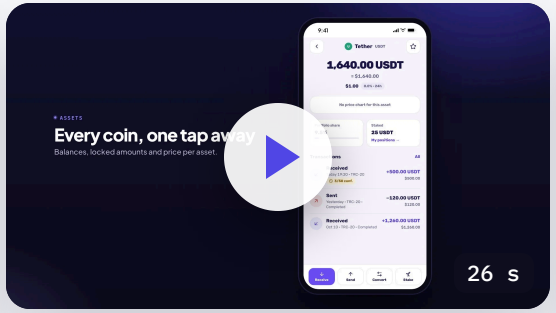

## Exchange

Markets, the Pro terminal, Easy Trade and Launchpad.

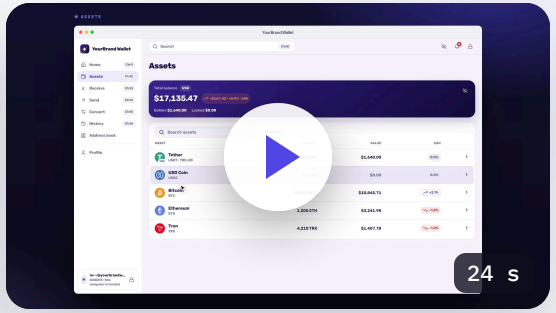

## Exchange app

iOS and Android: markets, trading, deposit, Earn.

## Wallet app

Balances, Earn, Convert, receive and an address-checked send.

## Desktop wallet

macOS and Windows, keyboard-first send, device sessions.

**Films, the payment demo and the console demo**

Want it live with your data? A guided session takes 45 minutes, with the engineers who run the system.

DEPLOYMENT

# Three ways to run it.

The client always operates under its own licence. The model decides where the system runs and who holds the code.

HOSTED

## Cloud

Hosted by us under the client's brand. Monthly fee plus a one-time setup. Fastest start; we run infrastructure and updates.

YOUR SERVERS

## Self-hosted

On the client's own servers, inside its perimeter. One-time licence plus 20% a year for updates and support. For teams that need the system inside their own perimeter.

SOURCE ACCESS

## Source code

Perpetual source licence for teams that want to modify and extend the code themselves. One-time fee; optional update stream.

| | |
|---|---|
| Testing a market or launching fast | CLOUD |
| Licensed in the EU, Gulf or Türkiye | SELF-HOSTED |
| Group building its own product line | SOURCE CODE |

PRICE LIST

# Public prices, in writing.

EUR, excluding VAT. Bundle pricing: 10% off with two or three products, 15% with four or more. Self-hosted adds 20% of the licence fee a year for updates and support. Apps and modules are priced in the configurator at bitpolaris.com/pricing.

| | CLOUD | SELF-HOSTED | SOURCE CODE |
|---|---|---|---|
| **Exchange** | €1,600 / month + €7,700 setup | €24,500 | €58,100 |
| **Wallet** | €670 / month + €3,350 setup | €11,900 | €28,700 |
| **Payments** | €410 / month + €2,100 setup | €7,700 | €20,300 |
| **Custody** | not offered as cloud | €15,400 (€14,000 with Exchange) | €37,800 (€33,600 with Exchange) |
| **Custom Token Platform** | €4,900 per network, fixed | | |
| **Proof of Reserves Kit** | €1,700 + €85 / month as an add-on · standalone from €6,300 setup + €490 / month | | |

SERVICES

# For clients applying for a licence.

Written from the system the client will actually run, so the file matches what the regulator later inspects.

ENTRY

## Technical file

System description, custody, AML and KYC sections mapped to the regime. From €1,250.

MAPPED

## Licence Technical Pack Pro

MiCA with DORA, VARA, Central Bank of Armenia or SPK: diagrams, ICT third-party register, restore drill record, key management, AML and Travel Rule flows. €6,300; regulator Q&A support €1,450 / month.

FIXED QUOTE

## Exchange migration

Users, balances, history and wallets moved in one announced window, reconciled before and after. From €9,500, with a fixed quote after assessment.

MONTHLY

## Managed operations

Monitoring, alerting and response for self-hosted installs. €2,100 onboarding + €1,450 / month.

QUOTE

## Custom development

Wallets, payment flows, integrations and new products built to scope. Written proposal and fixed price within about a week.

REPORT

## Cost audits

TRON fee and RPC usage audits with concrete savings. €750 each.

BUILT FOR LICENSING

# What regulators ask for, delivered with the system.

| THE REGULATOR ASKS FOR | WE DELIVER |
|---|---|
| **System description and architecture** | Diagrams, data flows, environments and third-party list |
| **Client asset segregation and custody** | Wallet map, approval policy, daily on-chain reconciliation, PoR exports |
| **ICT risk and business continuity** | Control mapping, backups with tested restores, incident runbook |
| **AML, KYC and Travel Rule** | Two KYC providers, screening, decision logs, transfer data fields |
| **Market integrity** | Self-trade prevention, market-making disclosure, volume-split reports |
| **Records and audit trail** | Every money action and settings change logged and exportable |

Regimes we map to: MiCA with DORA · VARA (Dubai) · Central Bank of Armenia · SPK (Türkiye). Others on request.

PARTNER PROGRAMME

# Your clients need the platform; our clients need your licences.

REFERRAL

## 10% of first-year licence fees

Law firms, licensing consultants and formation agents: you recommend us when your clients need technology. We qualify, propose, deliver and support. Paid within 30 days of the client's payment; your introduced clients, their invoices and your commission in the partner portal. Written terms, no exclusivity.

RESELLER · INTEGRATOR

## Wholesale 25–35% below list

Offer BitPolaris under your relationship and set the client price. We deliver, host if needed and support; you keep the client.

1. You introduce a client or a case
2. We send a written proposal within about a week
3. The client signs; we deliver
4. Commission paid on the client's payment, where your professional rules allow

**It works both ways.** Clients who come to us for a licence, a ready-made company or legal advice are referred to the partner firm we work with in that jurisdiction. You keep the legal work; we handle the technology.

NEXT STEP

# Send us one client case. We reply with a written proposal.

You keep the legal work. We handle the technology and the technical sections of the file. An anonymised brief is enough to start; NDA on request.
